Daily Work Report (9-Hour Shift)

Employee Details:
Employee Name: RASHMI S ANGOLKAR
Employee ID: MYHR047
Department/Team: Junior Software Developer
Date: 25/09/2026
Shift Time: 9:30 – 6:30

Task Summary (Hourly Breakdown)

Time slot	Task Description	Start time	End time	Duration	Status
09:20 -10:45	Today I logged in at 9:20 and continuedworking on Work Audit project Created the Spring Boot project (workaudit) in IntelliJ using Maven, Java, with base package com.workaudit.workaudit. Verified the generated project structure (src/main/java, src/main/resources, pom.xml, Maven wrapper files).	09:20	10:30	1hour10mnt	Completed
10:30 -11:30	Attended Work Audit project team members meeting with Manager Anagha Ma'am at 10:30 to 10:37 discussed yesterday's project work updates and continue working on the project Checked out the assigned feature branch Report-Processing-And-Validation from the shared repo so my module's work stays isolated from teammates' branches until merge.	10:30	11:30	1hour	Completed
11:30 -12:30	Updated pom.xml with required dependencies: Spring Web, Spring Data JPA, Spring Validation, PostgreSQL driver, Lombok, Apache PDFBox (3.0.3), and Spring Boot Test. Reloaded Maven and resolved build issues.	11:30	12:30	1hour	Completed
12:30 - 01:00	Continue working on Work Audit Project.	12:30	01:00	30mnt	Completed
01:00 – 01:50	LUNCH BREAK	01:00	01:50	50mnt	Completed

01:50 - 03:00	Continue working on project Installed/configured PostgreSQL locally and created the workaudit database via pgAdmin, in preparation for JPA entity mapping.	01:50	03:00	1hour10mnt	Completed
03:00- 04:00	Created DailyReport.java, ReportHourlyEntry.java, and ManagerMeeting.java under report/entity, mapping daily_reports, report_hourly_entries, and manager_meetings tables with the relevant @OneToMany/@OneToOne relationships.	03:00	04:00	1hour	Completed
04:00 - 05:00	Created ReportValidationResult.java, ReportError.java, and ReportDuplicate.java, along with supporting enums ReportStatus, DescriptionLevel, and ErrorType, to represent validation outcomes and flagged issues per report.	04:00	05:00	1hour	Completed
05:00 - 06:20	Started the repository/ package with DailyReportRepository.java, defining query methods for same-day peer lookups, employee history, and per-date/domain counts needed for later duplicate and dashboard queries.	05:00	06:20	1hour20mnt	Pending

Detailed Work Summary: Today, I continued working on the Work Audit project by creating the Spring Boot project in IntelliJ IDEA using Maven and Java, and verified the project structure and assigned feature branch. I attended the Work Audit team meeting with Manager Anagha ma'am and configured the required dependencies, including Spring Web, Spring Data JPA, PostgreSQL, Validation, Lombok, Apache PDFBox, and Spring Boot Test. I configured PostgreSQL and created the workaudit database, then implemented the report-related entities and validation models with the required relationships and enums. I also started the repository layer by creating DailyReportRepository and defining query methods for peer lookups, employee history, and date/domain-based counts required for duplicate detection and dashboard functionality.

Issues Faced/Roadblocks (If any technical or operational issues occurred) Support Needed:
No

Next Day Plan: Will Continue The Task For Apache Kafka And Go Lang And Continue The Work Audit Project.

Self-Evaluation (Productivity Level: Low/Medium/High)**:** Medium

Supervise or Remark (To be filled by reporting manager)**:**
